Waterproofing

	Product	Description	Application Area
	Roof Proof Kit	An easy to use acrylic general purpose waterproof compound used in conjunction with a woven membrane for waterproofing tiled, metal and timber pitched roofs. Includes free 200mmx10m membrane.	Ideal for waterproofing flashings, roof ridges, parapet walls, roof bolts, metal roof overlaps and similar pitched roof details.
	Acry Proof Original & Acry Proof Fibre	A multi-purpose waterproofing compound for flat roofs, pitched roofs, parapet walls and fish ponds. Can withstand the ponding of water. Available in two formulae: <ul style="list-style-type: none"> • Acry Proof Original – use in conjunction with a woven membrane for waterproofing details that span large areas or gaps, such as concrete roofs, dams, fish ponds, roof flashings and similar areas. • Acry Proof Fibre – use without a woven membrane. Is suitable for smaller more difficult areas, such as box gutters, small fish ponds, water features, roof bolts and similar waterproofing details. 	Flat roofs, pitched roofs, parapet walls and fish ponds.
	Leak Proof	Specially formulated two part cementitious waterproofing compound that bonds with any concrete structure to form a permanent waterproofing barrier that prevents damp, moisture, efflorescence and leaks.	Ideal waterproofing applications include concrete beams, columns, retaining walls, silos, bridges, reservoirs, water towers, ponds, roof slabs, basements, tunnels and subterranean features.
	Damp Proof	Specially formulated to seal plaster, masonry and concrete surfaces while holding back the penetrating water. It creates a tough water barrier on the inside of the wall and ensures a dry stable surface for the new coat of paint.	Plaster, masonry and concrete surfaces.
	Wall Proof	Waterproofs the wall without changing the colour or appearance of the original surface. It penetrates and ensures a weather resistant, ultra violet and wear resistant finish.	Sealing exterior face brick walls, face brick facades, clay surfaces, cement bricks, concrete structures, marble and granite cladding and similar exterior wall finishes.
	Bitu Proof	A water based, non-toxic , acrylic bitumastic waterproofing compound .	Ideal for waterproofing and sealing concrete dams, reservoirs, fish ponds, flower pots, roofs, foundation walls, underground structures and similar waterproofing details.
	ProLong Membrane	Acry Proof Woven Membrane is used in conjunction with ProLong Roof Proof Kits and ProLong Acry Proof Original. Also available: ProLong Pro Green Woven Membrane.	For roof areas, box gutters, flashing, parapet walls, roof nails, skylights, cracks, joints and gaps.
